

INTRODUCTION

The Covid-19 virus (commonly known as the Corona virus) had impact on the entire global economy and turned people's lives upside down. It affected countries the most that initially downplayed the problem and did not introduce any precautionary measures. These countries include among others, Great Britain.

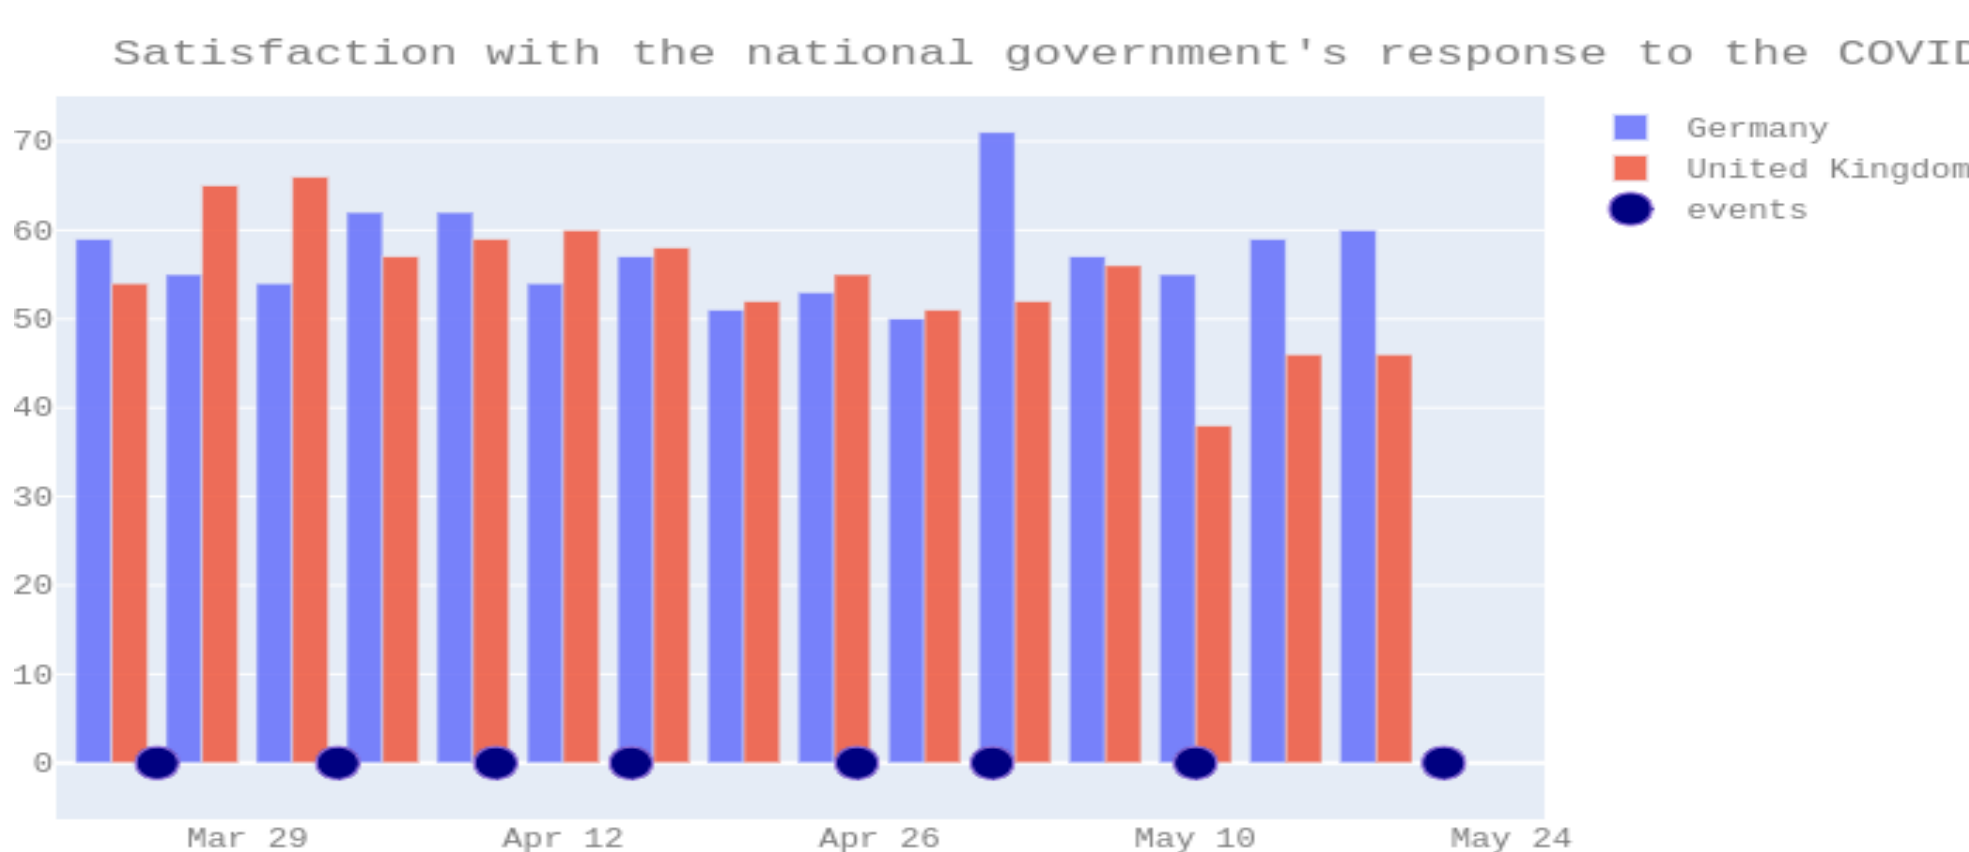

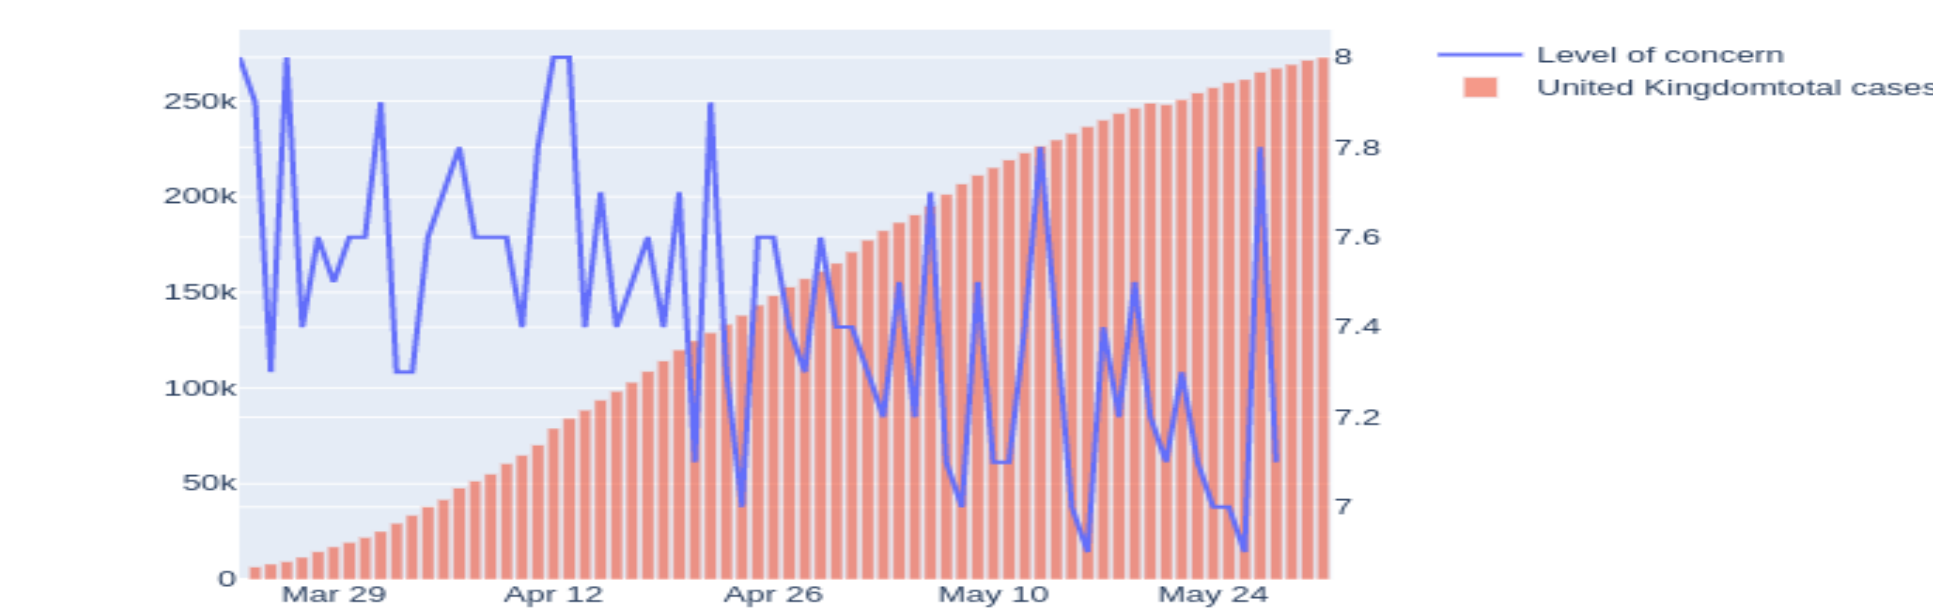

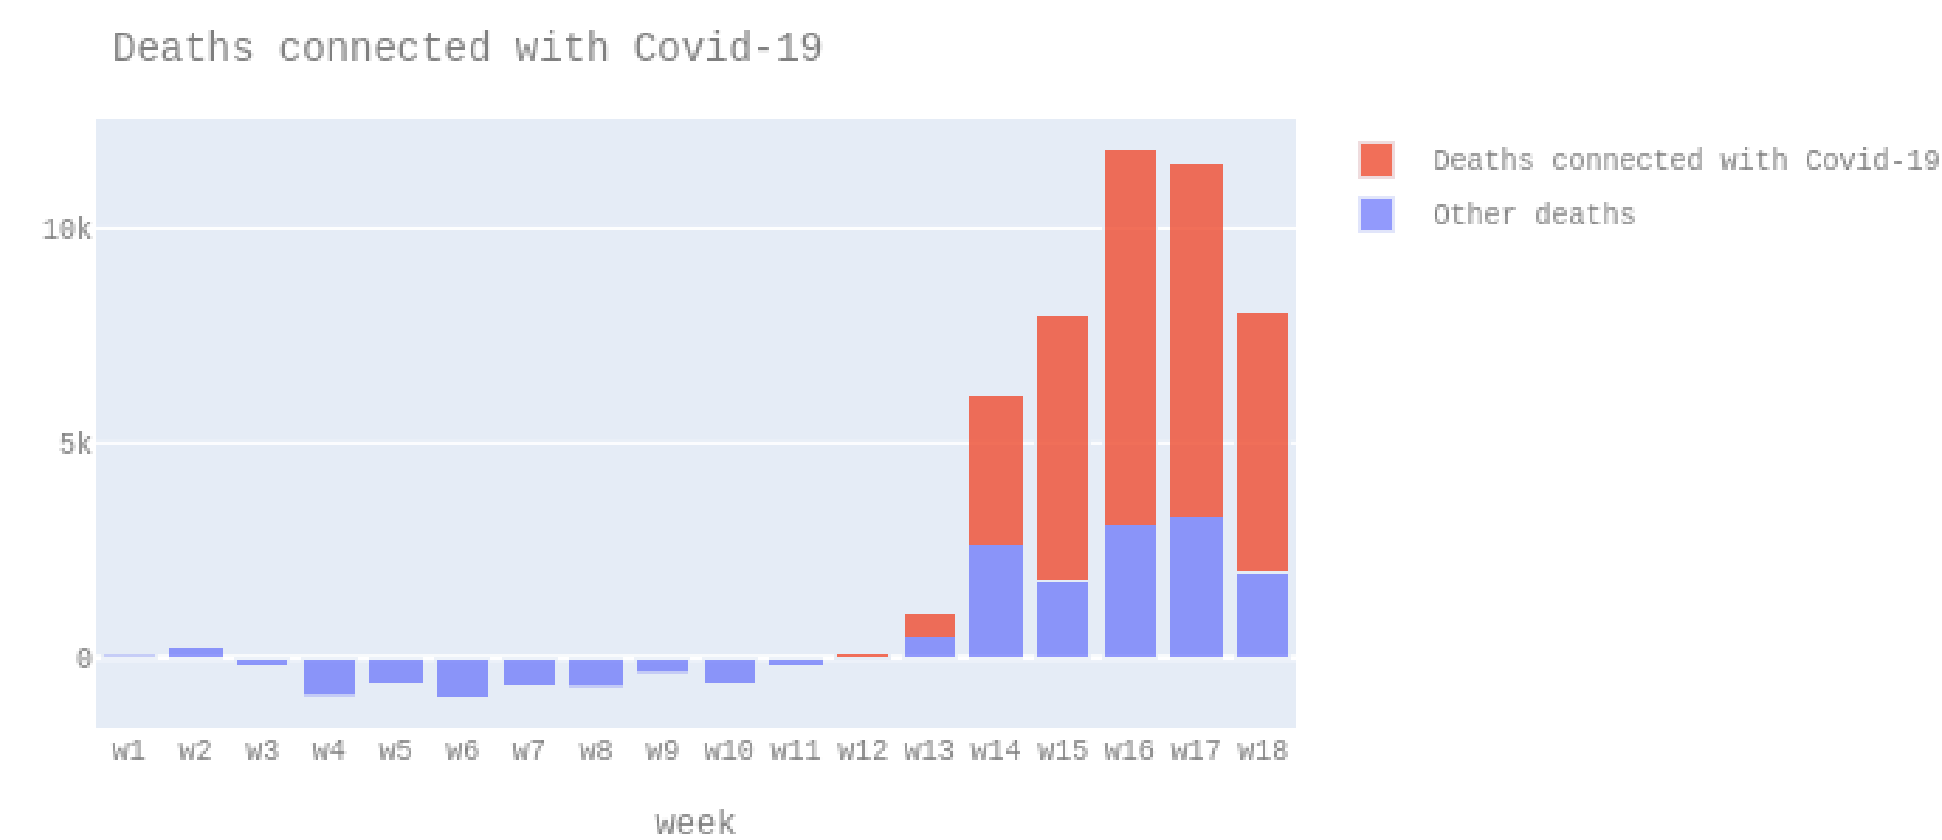

Authorities in UK reacted only when there were already 1950 cases in country and there was more than 400 new cases daily.

WORLD MAP

Closeness to UK by the distribution (RMSE) of total cases per million last 20 days

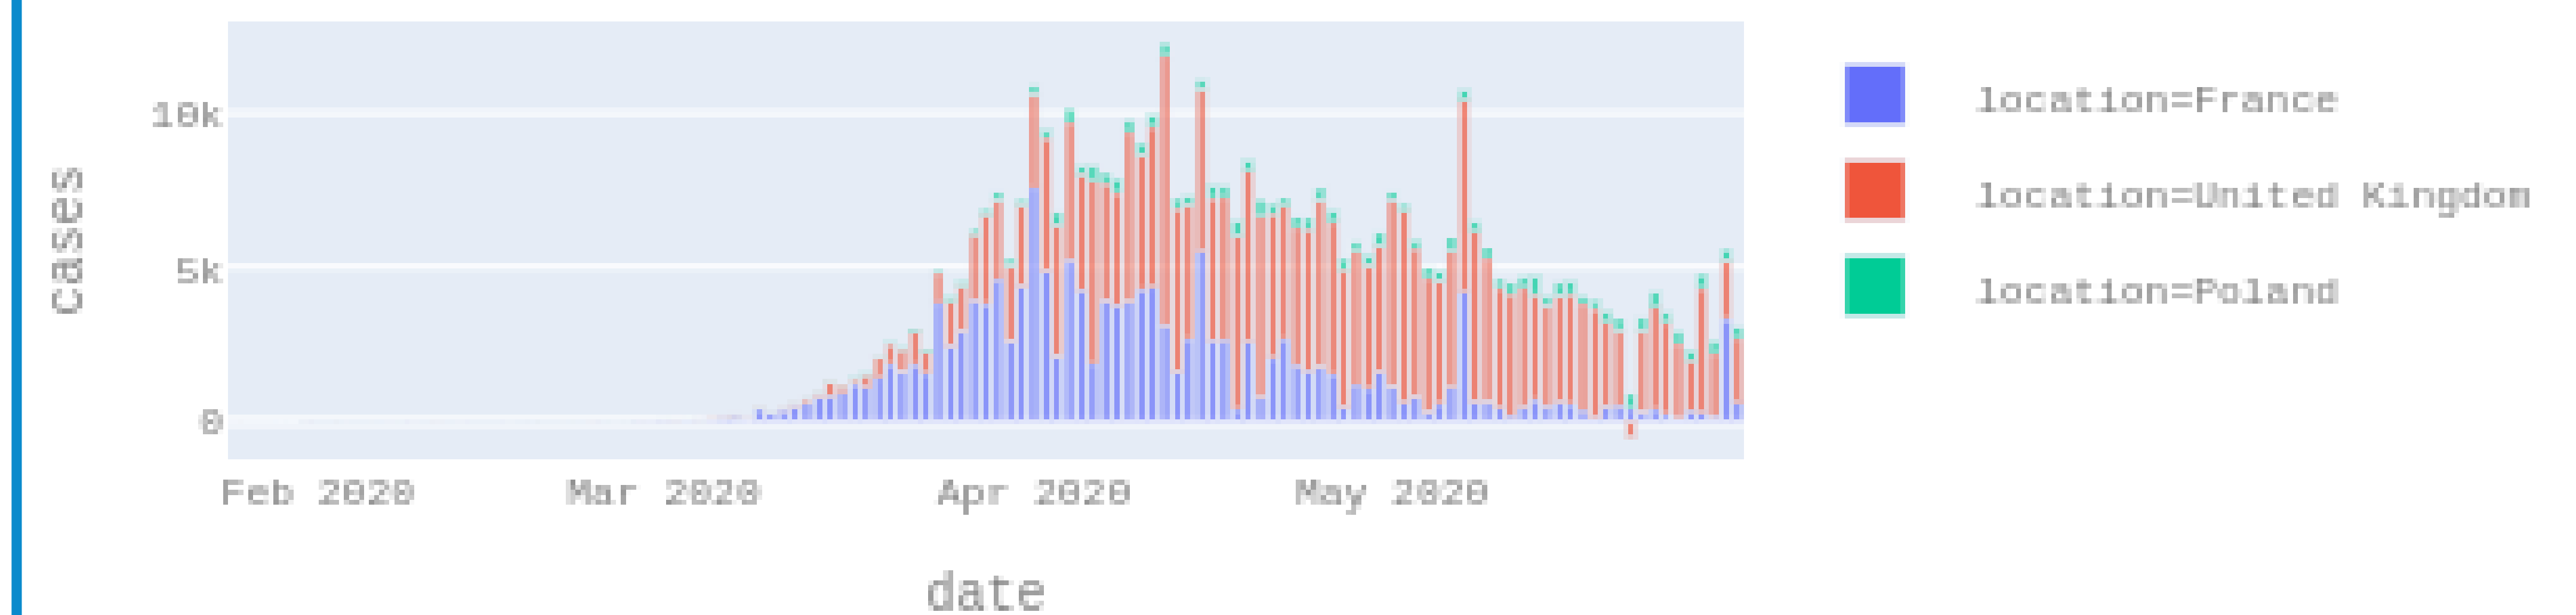

SOCIAL SENSE OF SECURITY

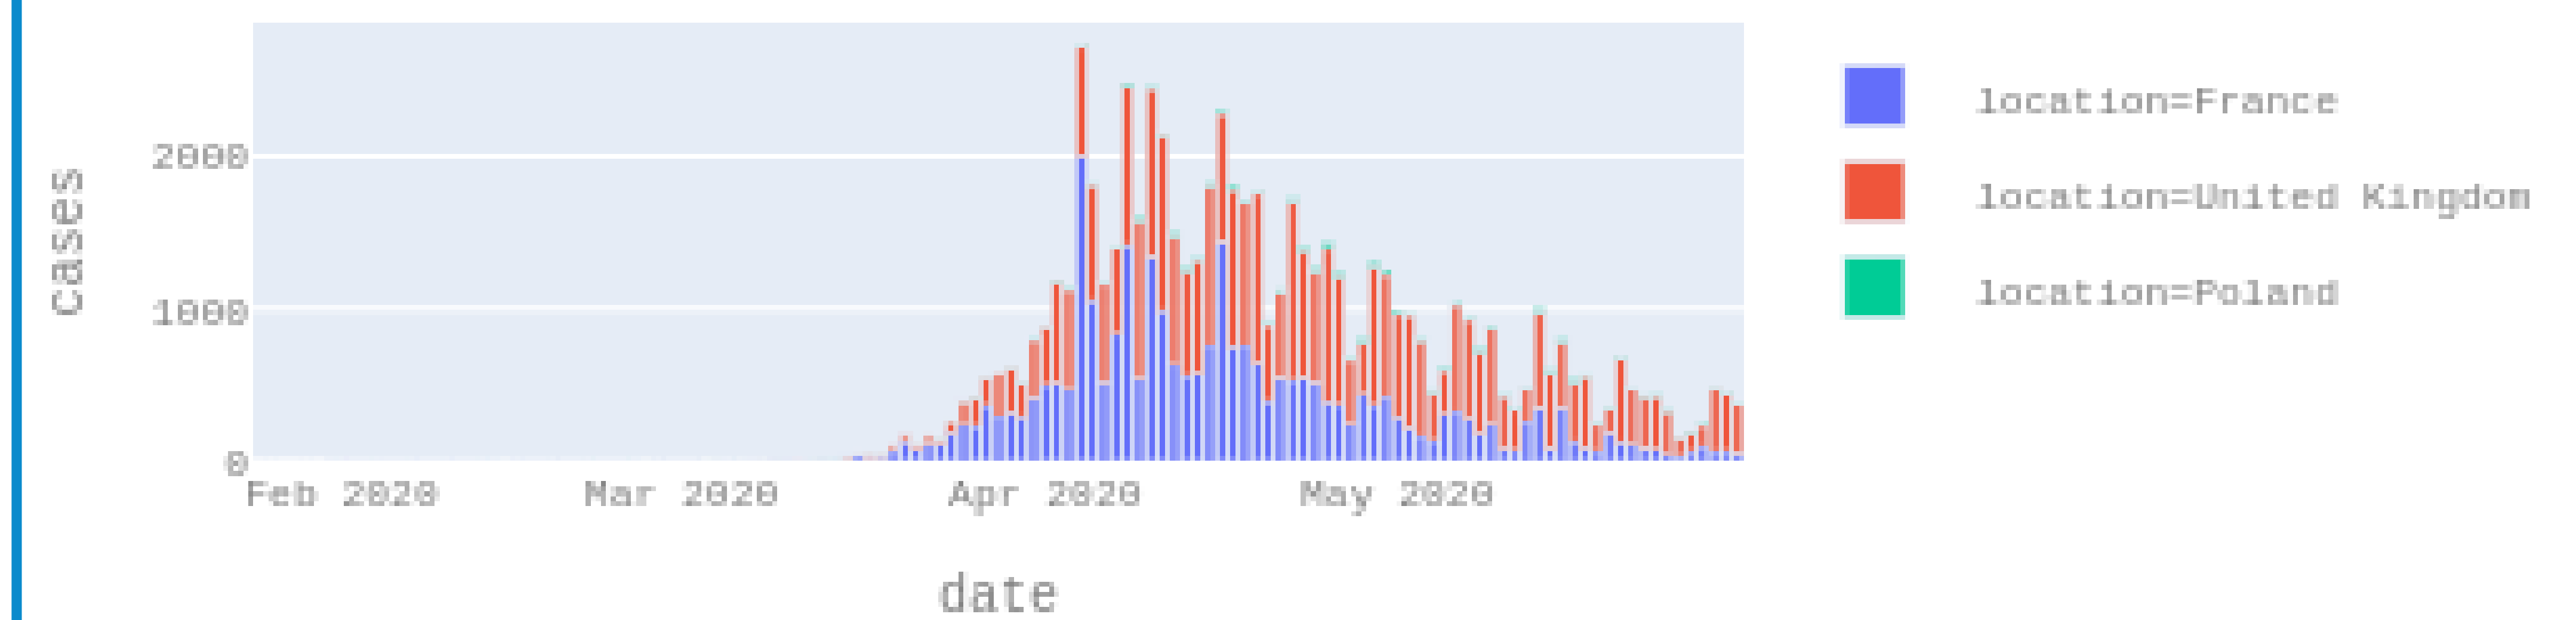

Despite still increasing death toll of Covid-19 and amount of total cases british people are less and less concerned about their situation.
